Bateman, Dr. F., on aphasia or loss of the power of speech, with remarks on our present knowledge of its pathology, 532

Bath United Hospital, 164

Bauer, Dr. L., Lectures on Orthopædic Surgery, delivered at the Brooklyn Medical and Surgical Institute (review), 623

Bavaria, liberal change in, 494

Beck, Dr. T. S., on puerperal fever, 340

Bedford Dispensary, 302

Belfast General Hospital, 107

—— branch of the Royal Medical Benevolent Society of Ireland, 219

Belfour, Mr. E., death of, 136; the late, 146

Belgians, King of the, health of, 543

Bell, Mr. J., treatment of gunshot wounds, 216

Bennet, Dr. J. H., on excessive sickness in pregnancy, 13; on the connexion between phthisis and uterine disease, 561; on the surgical treatment of painful menstruation, 673

Bennett, Dr. J. H., on the treatment of pneumonia by restoratives, 195

Bequests, 25, 104, 190, 275, 302, 354; novel, 467 munificent, 637; strange, 694

Berlin, new anatomical museum at, 50; correspondence from, 383

Bermuda, the epidemic at, 71

Bernays, Dr. A., Notes for Students in Chemistry (review), 570

Berry, Mr. H. T., recurring or relapsing fever, 490

Bethlehem Hospital, 16; recommendations of the Inspector of Charities, 67; balance-sheet, the, 215; General Report of, for 1864 (review), 569

Birth and death rate of Great Britain, 346

Black list of medical assistants, 305, 331, 356, 414, 468, 496, 554, 667

Blackburn, Dr., 594, 609

Blackburn Infirmary, 50

Bladder, communication of the, with the peritoneum, and with an abscess in front of it, resulting in death from peritonitis, 9; very stout hair-pin taken from the, 295; paralysis of the, 507

Blane medals, the, 190

Blegborough, Dr., death of, 303

Blood, determination of the heat of the, 189

Bolton, Dr. J. A., professional juries: the trial of Constance Kent, 583

Bourdeaux, medical congress at, 183, 354

Bournemouth, the sanitary condition of, 74, 234, 410

Bowen, Dr. E., subscriptions for, 22, 77, 245; Pryce and Wife v. Bowen, 161

Brain, disease of the, of a tuberculous nature connected with loss of speech, 63; abscess of the, notes of a case of, 89; entrance of a piece of lead, two ounces in weight, into the centre of the, death resulting twenty-seven hours after the receipt of the injury, 287

Bree, Dr. C. R., duties of grand juries, 139

Brighton review, the, volunteer medical officers, 413

Bright's disease, on, 1, 29, 55, 83, 251

Bristol, fever at, 179

Briton Medical and General Life Association, 411

Brodie, Sir B. C., the Works of (review), 482; the autobiography of, 529

Bromide of potassium, on the action of, 522

Brompton Hospital, royal visit to, 302

Bronchitis, Fetid, and other Lung Diseases with Fetid Breath, Notes on (review), 597

Broom, Mr. C., small-pox v. insanity, and prevention of pitting in the former, 400, 609

Brown, Mr. J. R., on a new plan of securing the pedicle in ovariotomy, 231

——, Mr. W. H., on street mortality, 105; warm covering, 555

Browne, Dr. W. V., obituary of, 639

Brown-Séquard, Dr. C. E., on a special form of paraplegia, 631

Budd, Dr. W., bacteridia and malignant pustule, 47

Budgett, Mr. J. R., coroners' inquests at the East-end, 522

Butcher, Mr. R. G., Essays and Reports on Operative and Conservative Surgery (review), 263

Butler, Dr. A., the case of Mary Green, 463

C

Cæcum, perforation of the, following stricture of the rectum, 506

Cæsarean operation, 245; successfully performed for both mother and child, 84

Calculus adhering to the coats of the bladder, 288

Calcutta, sanitary state of, 190

Cambridge University, 552, 650, 694; Natural Sciences Tripos at, 49, 69, 70, 77; scholarships for natural science at, 218

Cammack, Mr. R., testimonial to, 302

Cancer, and the Tumours analogous to it, on the Diagnosis and Treatment of (review), 11; of the femur, involving amputation at the hip-joint, 92

Capital punishment within gaols, 245

Caries, of single bones of the tarsus and metatarsus, on the treatment of, by excision of the entire bone, 59, 173, 559; of the spine, in the lower dorsal and lumbar regions, on the early diagnosis of, before the production of angular curvature, 518

Carson's (Dr.) mode of slaughtering animals, 111, 136, 304

Carter, Mr. R. B., on a compound ophthalmoscopic object-glass, 383

Cass, Dr., present from her Majesty to, 80

Catarrhal states, chronic, the therapeutics of, 228

Cattle, inhuman treatment of, 292; diseases in, 274, 551

Cerebro-spinal meningitis, epidemic, on the, 388, 431, 496

Certificates in lunacy, 468

Cervix uteri, dilatation or division of the, 381, 440, 491, 556, 582

Chapman, Dr. J., a case of cerebral anæmia, or

"fainting fits," cured chiefly by means of ice, 148; vomiting after scarlet fever, 220; Functional Diseases of the Stomach: Sea-Sickness, its Nature and Treatment (review), 232
Charges, professional, 155, 194
Charing-cross Hospital Medical Society, 329
Charqui, or jerked beef, report on, 186
Chemists and Druggists Bills, 328, 363, 577, 612, 661, 668
Chemistry, a question in, 277, 305; facilities for the study of, at Cambridge, 353; Notes for Students in (review), 570
Child, Dr. G. W., on a fatal case of Addison's disease, 176

MIRROR OF THE PRACTICE OF MEDICINE AND SURGERY IN THE HOSPITALS OF LONDON.

BRITISH LYING-IN HOSPITAL.—Deformed pelvis; induction of premature labour; turning and craniotomy, 593

CHARING-CROSS HOSPITAL.—Depressed fracture of the skull from the kick of a horse, 120—Strumous disease of the shoulder-joint; resection; good recovery, 258—Disease of the left upper jaw-bone, originating primarily in a blow from the fist; successful removal of the entire bone, 477

DREADNOUGHT HOSPITAL SHIP.—Fatal case of scurvy; post-mortem examination, 594

GREAT NORTHERN HOSPITAL.—Calculus in the bladder, of small size, extirpated by a single crushing with the lithotrite, 62—Calculus in the bladder of an old man; successful lateral lithotomy, 364

GUY'S HOSPITAL.—Eight cases of calculus in the bladder, including one of forty-two uric acid calculi, and another in which the stone was composed of cystine, 62—Twelve cases of typhus and typhoid fever treated without stimulants; clinical remarks, 90—Very large ulcer of the stomach perforating the peritoneum, 507

HOSPITAL FOR SICK CHILDREN.—Three cases of stone in the bladder, removed by lateral lithotomy; recovery, 366

KING'S COLLEGE HOSPITAL.—Calculus in the bladder of a child; lateral lithotomy; recovery, 9—Large calculus in the bladder of a boy; lateral lithotomy; recovery, 36—Mulberry calculus in the bladder of a shipwright; lateral lithotomy; recovery, ib.—Calculus of the kidney, bladder, and urethra, with perineal abscess; former history of stricture; fatal result, ib.—Case of inoculation of syphilis from the discharge of a secondary sore, the disease being communicated from the mouth of the husband to the wife's cheek; clinical remarks, 119—Three cases of stricture treated by Holt's plan of forcible dilatation; clinical remarks, 120—Tubercle of the lungs and intestines; perforation of the ileum, 506—Stricture of rectum; perforation of cæcum, ib.—Necrosis of the head of the humerus, necessitating the operation of exision; good recovery, 536

LONDON HOSPITAL.—Six cases of compound fracture of the skull; trephining in all, with recovery in two; clinical remarks, 118—Extensive necrosis of the shaft, head, and neck of the femur, in a child; amputation at the hip-joint, 566

MIDDLESEX HOSPITAL.—Tumour of the kidney lying in the abdomen in front of the intestines, mistaken for an ovarian tumour; operation; death; post-mortem, 285—A case in which the same person was twice infested with guinea-worm, 366

ROYAL FREE HOSPITAL.—Calculus in the bladder; lateral lithotomy; successful result; analysis of the stone, which consisted chiefly of the urate of lime, 6—Calculus in the bladder, removed by lateral lithotomy, with successful result; analysis of the stone by Dr. Hassall, 315

ROYAL LONDON OPHTHALMIC HOSPITAL.—Primary and secondary syphilitic sores on the eyelids, 478

ST. BARTHOLOMEW'S HOSPITAL.—Phlegmonous erysipelas following fracture of the forearm; six days' duration; amputation; recovery, 257—Calculus in the bladder; lateral lithotomy; recovery, 305—Compound dislocation of the lower end of the humerus forwards; laceration of soft parts; mortification of the limb; amputation; recovery, 535

ST. GEORGE'S HOSPITAL.—Three calculi in the bladder, the largest weighing 5½ oz.; communication of the bladder with the peritoneum, and with an abscess in front of it; death from peritonitis, 8—General melæsma and short hair over the entire body of a child of three years, with conversion of the left supra-renal capsule into a large malignant tumour; the external organs of generation resembling those of adult life, 175—Hydrothorax; chronic ulcer of the stomach perforating the peritoneum and coronary artery, 700

ST. MARY'S HOSPITAL.—Cases of calculus in the bladder of children; lateral lithotomy with the straight staff; recovery, 37—Case of malignant disease of the femur, for which amputation was performed at the hip-joint; recovery from the operation, but death two months afterwards from secondary malignant deposit in the pleura, 508—Malignant disease of the thigh, of rapid and painful growth, requiring amputation at the hip-joint; recovery from the operation, but death nearly eight weeks afterwards from pus in the femoral artery, 651—Severe compound comminuted fracture of both lower limbs; amputation of one at the hip-joint, of the other above the knee, 652

ST. THOMAS'S HOSPITAL.—Cases illustrative of traumatic effusion of different kinds from various causes; clinical remarks, 229—Cases of resection of the knee-joint; clinical remarks, 478—Separation of the head from the shaft of the humerus, the result of a fall, complicated with singular chest symptoms, 535

SAMARITAN FREE HOSPITAL.—General hysterical paralysis treated by the continuous galvanic current; recovery, 175—Malignant tumour of the thigh, obliterating the femoral artery; amputation at the hip-joint; recovery, 653

UNIVERSITY COLLEGE HOSPITAL.—Calculus of large size in the bladder of a man aged sixty-three years; lateral lithotomy; cure, 7—Three cases of calculus in the bladder, two treated by crushing, and one by cutting, 314—Hair-pin embedded in the bladder and soft parts within the pelvis; removal by the high operation; fatal peritonitis, 534

WEST LONDON HOSPITAL.—Calculus in the bladder, of hereditary origin; lateral lithotomy; recovery, 10—Phlegmonous erysipelas of the upper extremity, and suppuration of the axillary glands, following a puncture of the forefinger; amputation; recovery, 257

WESTMINSTER HOSPITAL.—Calculus in the bladder of a child; lateral lithotomy; recovery, 9—Large calculus in the bladder; median lithotomy; death from pyæmia, 37—Large fibrous tumour of the scrotum involving the testicle; ulceration of skin; castration; recovery, 230—Excessive lacerated wound of scalp, followed by meningitis and suppuration of the arachnoid over the left cerebral hemisphere, and loss of speech, 308—Severe erysipelas of head and face, producing œdema of the larynx; tracheotomy; successful result, 536—Anæsthesia and analgesia of the left half of the body, from head to foot, the effects of lead-poisoning, 592
